

Product 1 Product 2

- Connect YELLOW wires of all heads together for synchronization.
- To change flash patterns, apply + VDC for less than 1 second and release.
- Flash patterns will be reset when YELLOW wires are connected to RED wire for more than 5 seconds.

A 10A fuse is required for connecting the positive terminal of the product to the battery.

Synchronous: Set the flash mode to be the same for Product 1 and Product 2.
 Alternating: After setting the flash mode to be the same for Product 1 and Product 2, then select one.
 Set to alternating mode.
 Priority: Mode 4 > Mode 3 > Mode 2 > Mode 1

Apply yellow wire to positive pole
